FutureRTC: Anticipating the context at execution time

Observation time

O_t, S_t

Committed actions

Anticipate execution-time context

Policy (with anticipated context)

Next-chunk execution

Execution boundary

Previous chunk

0 1 2 ...

New action chunk

TacPAC: Correcting an unexecuted suffix with fresh tactile feedback

Initial plan

O_t → Policy → Action plan α

Execute and observe

Execute prefix

Current tactile feedback

Cached tactile-action reference (KV)

Compare and correct

Updated action sequence

Prefix unchanged, suffix corrected

Executed prefix

Corrected suffix

Execution boundary
